X11/22 Data link connector (1.3)

P00.30-2028-06

1 Connect STAR DIAGNOSIS (0100) to the data link connector (X11/4) or the data link connector (1.3) (X11/22).

2 Switch on ignition.

3 Start the Diagnosis Assistance System.

4 In the "Model designation" menu select the "Additional model designation" submenu.

5 Follow the instructions on the screen:
D Enter new control unit version.
D Read fault memory, erase
D Read actual values.
D Perform actuations.
D Adaptation of control units.

6 Disconnect STAR DIAGNOSIS (0100).

i Stored faults which may be caused by disconnecting cables or by simulation during testing operations must be deleted in the diagnostic trouble code memory following completion of the operations.
